LUXURY HIMALAYAN GIFTS

Festive Season 2026

A Note from the Founders

We did not start Tenacious Bee because we wanted to sell honey.

We started because we've always known that if people could make a good living from caring for bees, they would protect everything the bees depend on- forests, farms, traditions, communities, and one another.

So rather than building a business around honey, we decided to try something more ambitious- to build an economy around the well-being of the bee.

That idea has guided every decision we've made since.

The honey is where most people begin. But for us, it has always been evidence that when bees thrive, remarkable things become possible. The objects we create, the experiences we host, and the communities we work alongside all exist because of this belief.

Over the years, we've developed the habit of referring to the bees as our CEO's. It began as a joke. But we've noticed that whenever we make decisions in their interest, unexpected opportunities, collaborations, and moments of good fortune seem to find their way to us.

Perhaps that is coincidence.

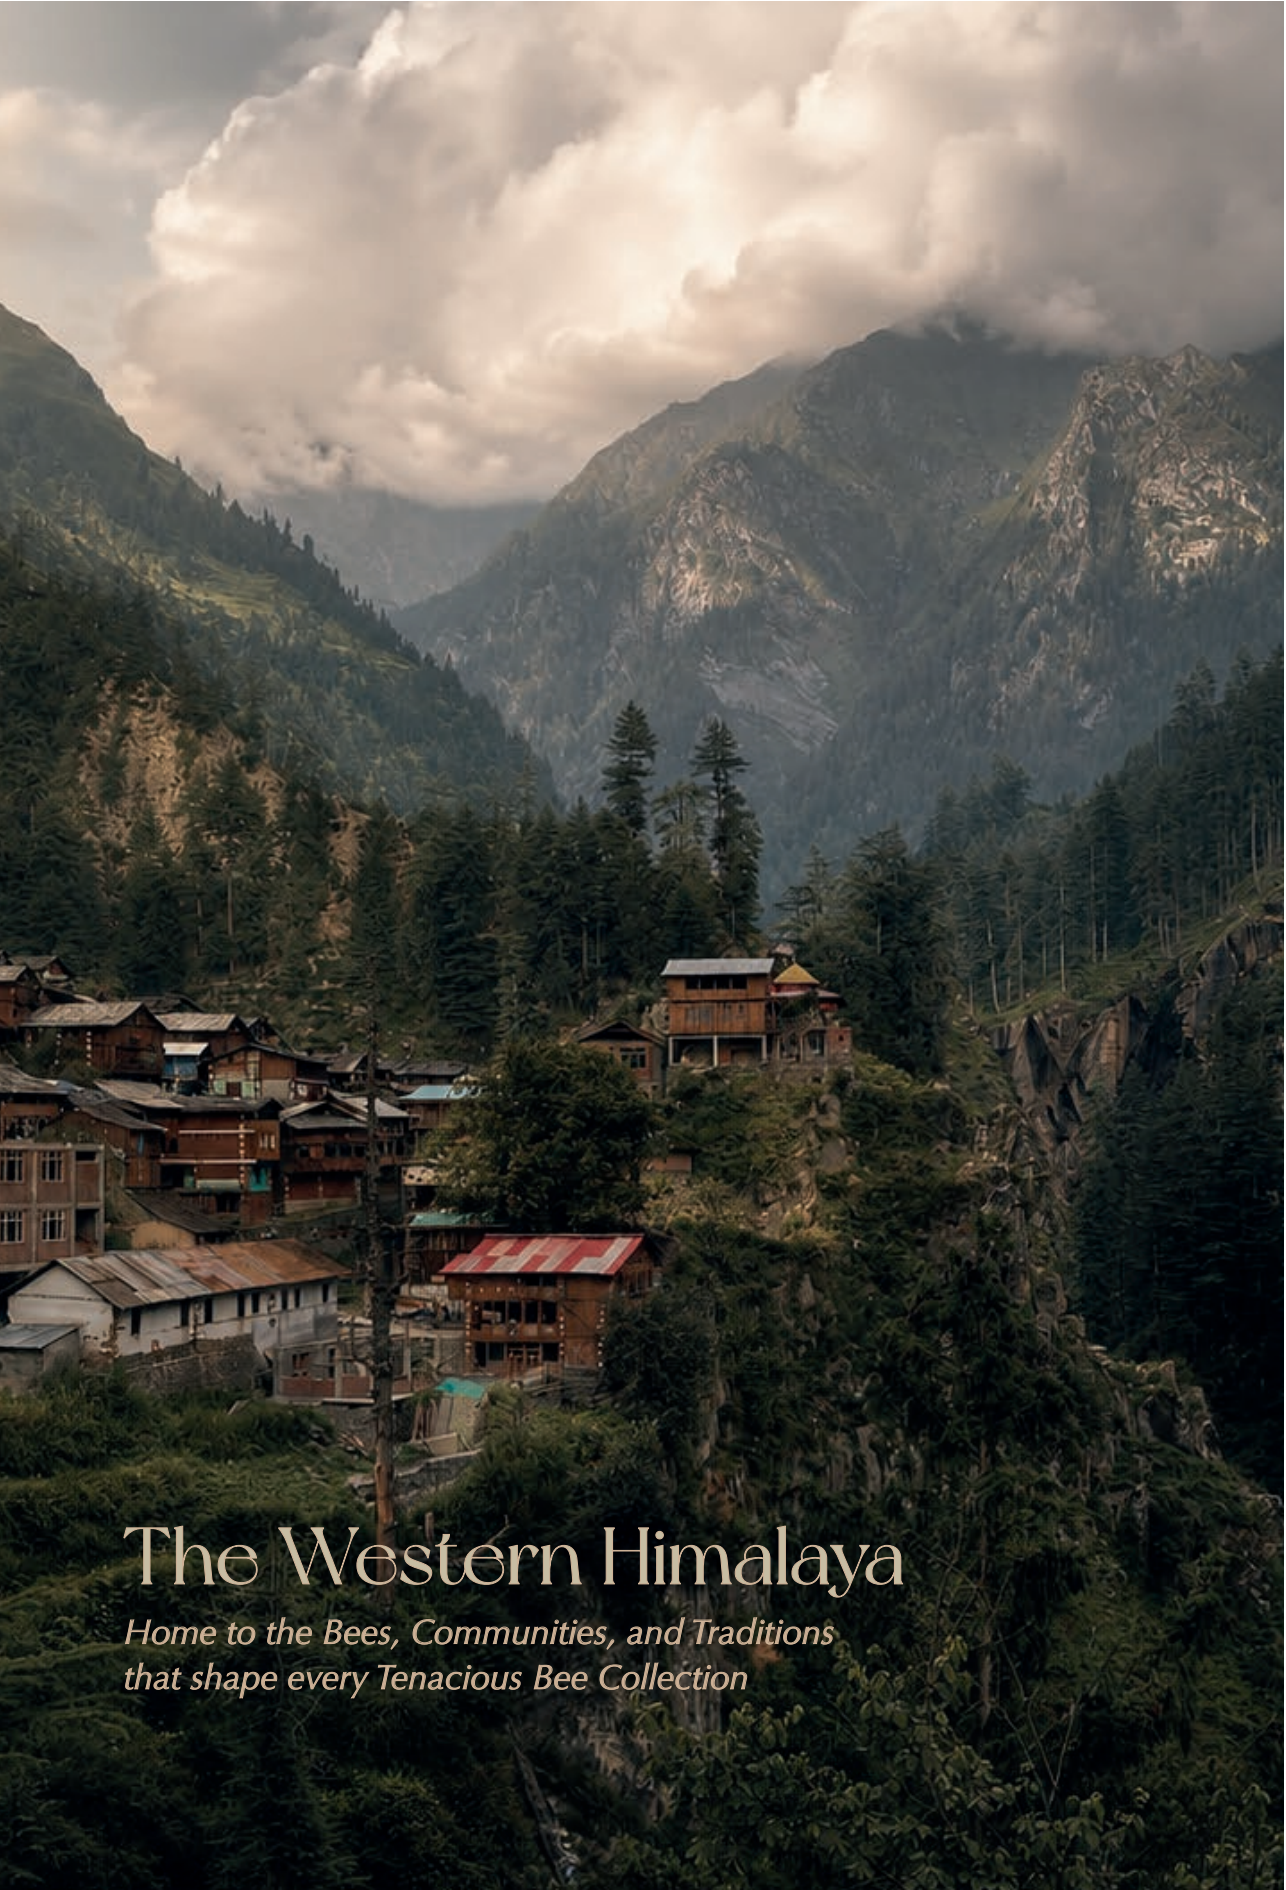

Or perhaps the bees know what they are doing.

This catalogue is an invitation into the world we are building around the bee. A world of extraordinary tastes, meaningful experiences, and communities that thrive together.

We are delighted to welcome you into it.

As these vernacular structures disappear, so do the traditions they sustained.
